

# Third Thursday Virtual Event

## EARTHQUAKE in TURKEY

On February 6, 2023 a 7.8 magnitude earthquake rocked the Turkey/Syria border. Over 8 million residents have been affected by the 62-mile-long natural disaster. In this training, we will discuss the causes and impacts of earthquakes, hear from family members about the ongoing challenges for survivors, and discuss lessons learned from volunteers who have provided aid and support in this region. This training targets those involved in identifying, planning, and implementing hazard mitigation strategies and projects. Those who are also interested in this subject matter are welcome to attend this free one-hour seminar.

THURSDAY

April

20

2023

12:00 p.m. HST

3:00 p.m. PST

6:00 p.m. EST
